

BRAJ KISHORE YADAV

FULL STACK DEVELOPER — MERN STACK — BACKEND DEVELOPMENT

📞 +91-9131647299 | ✉ yadavbrajkishore678@gmail.com | 🔗 linkedin.com/in/brajkishore-yadav | 🌐 github.com/Brajkishore-yadav

Summary

Full Stack Developer focused on building scalable, production-ready web applications with **JavaScript, TypeScript, React.js, Next.js, Node.js, Express.js, and MongoDB**. Experienced in **REST API development, authentication, database-driven applications, backend architecture, responsive UI, and third-party API integration**. Built and deployed real-world products with a strong focus on usability, security, and clean architecture. Solved **200+ Data Structures & Algorithms problems** across competitive programming platforms.

Technical Skills

Languages: C++, JavaScript, TypeScript, Python, SQL

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, ShadCN UI

Backend: Node.js, Express.js, REST APIs, Authentication, API Design, Backend Architecture

Databases: MongoDB, PostgreSQL

Core: MERN Stack, Full Stack Development, Data Structures & Algorithms, Object-Oriented Programming

Tools & DevOps: Git, GitHub, Docker, Postman, VS Code, Deployment

Integrations: Gemini API, Clerk, Arcjet, Third-Party APIs

Projects

Batua – AI-Powered Finance Tracker — *Next.js, React, ShadCN UI, Clerk, Gemini API, Arcjet* **2026**

- Built and deployed a full-stack finance platform for **expense tracking, budget management, and personalized financial insights**, designed for real-world daily usage.
- Developed responsive and reusable UI components using **Next.js, React, and ShadCN UI**, with secure authentication and user management through **Clerk**.
- Integrated **Gemini API** for automated expense categorization, spending analysis, and personalized financial recommendations.
- Implemented application security using **Arcjet**, including rate limiting and bot protection for production-facing workflows.
- Live Application: batua-g5xj.onrender.com

ChatPay – Universal Paid Help Marketplace — *MERN, Node.js, Express.js, MongoDB, REST APIs* **2025**

- Built a full-stack marketplace connecting users with experts for **paid help through chat, voice, and task-based interactions**.
- Developed modular **REST APIs using Node.js and Express.js** with MongoDB for users, expert profiles, reviews, wallets, and transaction workflows.
- Implemented core platform features including **authentication, expert discovery, instant-connect, reviews, wallet management, and escrow-based payment architecture**.
- Designed a modular backend structure to support **scalable feature development, service separation, and AI-powered user matching**.
- Source Code: github.com/Brajkishore-yadav

Achievements

- **Smart India Hackathon:** Selected from IIIT Ranchi to represent the institute at the national-level Smart India Hackathon.
- **DSA:** Solved **200+ problems** across LeetCode, Codeforces, CodeChef, and GeeksforGeeks.
- **Competitive Programming:** Regular participant in Codeforces and CodeChef contests, strengthening algorithmic problem-solving and competitive programming skills.

Education

Indian Institute of Information Technology (IIIT) Ranchi

B.Tech in Electronics and Communication Engineering

2028

CGPA: 9.3 / 10

Additional

- **Interests:** Full Stack Development, Backend Engineering, Scalable Web Applications, Distributed Systems, Real-Time Applications, Cloud Deployment, and API Architecture.
- **Open Source:** Builds and maintains software projects and utilities on [GitHub](https://github.com).
